

Real-time employee management application.

Zeppos is an advanced employee management application that deploys all the advantages of Helios to cell phones, smartwatches, and tablets. Zeppos is an extension of our management application and allows you to manage all your assets and team from one platform.

Zeppos is easy to use, powerful, and offers an intuitive modern Admin Panel that gives you granular control over your assets, fleet, and employees. Zeppos lets you leverage the information you need without getting lost in pages of data while tracking and managing all your assets on the go.

Take advantage of the real-time visibility of your assets and make quick, informed decisions with accurate insights with Zeppo.

Special features

- ⦿ Allowing managing all assets and team members under one platform.
- ⦿ Track and Trace both your vehicle and your drivers.
- ⦿ Emergency button.
- ⦿ User friendly, cost-effective and reliable.

Helios Tracker superior technology - built to work better and last longer
